CONTENTS
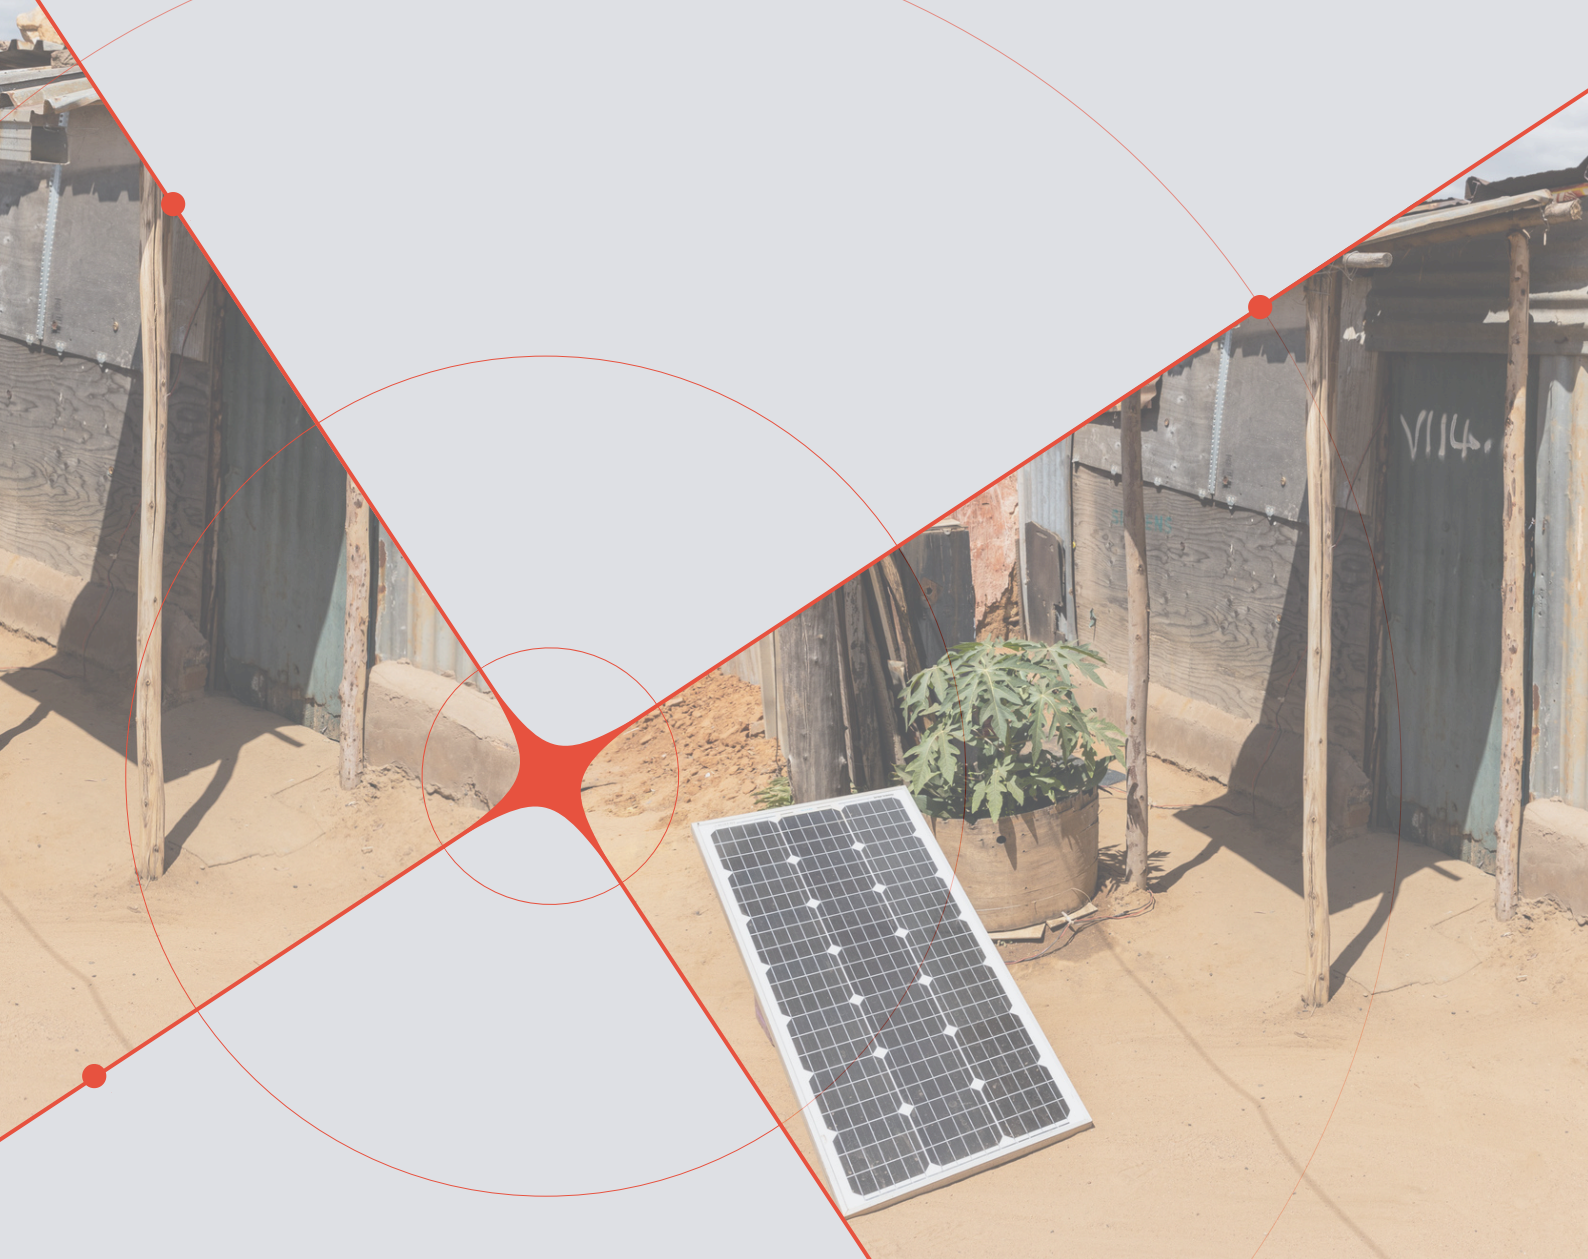

WHAT IS #POWERTRACKER?

#PowerTracker tracks and maps renewable energy projects and coal-fired power stations set to be decommissioned across Southern Africa. #PowerTracker is a project of Oxpeckers Investigative Environmental Journalism, and serves as a resource for researchers, journalists and policy-makers.

HOW TO USE #POWERTRACKER

How to use the #PowerTracker Mapping Tool

TESTIMONIALS

MY #POWERTRACKER EXPERIENCE

From environmental journalists to activists, community workers and business leaders, we have asked users to describe their experience of working with the #PowerTracker mapping tool. These are just a few of their testimonies.

WHAT THE DATA SHOWS

RENEWABLES ON THE RISE

There has been a continued uptake of renewable energy projects in Mpumalanga, with a notable spike in 2023, several coming online in 2024 and even more planned for subsequent years.

SPOTLIGHT: #POWERTRACKER INVESTIGATIONS

Our reporters have spent the past two years investigating the renewables revolution in Mpumalanga. These are some of the stories they have told.

WEBINARS

We have hosted several webinars focused on #PowerTracker over the last two years. These include launching the tool and reflecting on the impact our work has had so far.

What's happening in SA's energy capital?

We would like to once again thank the African Climate Foundation's New Economy Hub for its support. Without their continued support, Mpumalanga #PowerTracker would not have been made possible.
